

Main Idea and Details

Read and circle the correct answer.

All About Planets

We live on a planet called, Earth. There are 8 planets in the solar system. Each planet circles around the sun. The planets closer to the sun are Mercury, Venus, Earth and Mars. They are the rocky planets. The planets further away from the sun are big and are made of gas. They are Jupiter, Saturn, Venus and Uranus.

What is the main idea?

The Earth is the only planet

Mars is a gas giant

Earth is one of many planets

Main Idea and Details

Read and circle the correct answer.
