

Compare and Contrast

Read both stories and write your answer.

Story #1

Polar bears are the largest meat eating animals in the world. Polar bears live in cold areas like the Arctic and are marine mammals. A marine mammal are great swimmers and eat food they hunt for in the ocean. A polar bear's white fur helps it to blend into their snow covered environment and it also keeps them warm.

Story #2

There are many types of marine animals. One marine animal is called a seal. Seals can sleep on land and in water. They are great swimmers. Seals can be found in the Arctic, Antarctica, coastal regions and freshwater lakes. Seals eat food they find while hunting in the water including fish, krill and sometimes squid.
